

Notification template for Article 131 of the Capital Requirements Directive (CRD) – Other Systemically Important Institutions (O-SIIs)

Template for notifying the European Central Bank (ECB) and the European Systemic Risk Board (ESRB) of the setting or resetting of an O-SII buffer under Article 131(7) CRD and of the identity of O-SIIs under Article 131(12) CRD

Please send/upload this template to:

- macropru.notifications@ecb.europa.eu when notifying the ECB (under Article 5 of the Single Supervisory Mechanism (SSM) Regulation¹);
- notifications@esrb.europa.eu when notifying the ESRB.

The ESRB will forward this notification to the European Commission, to the European Banking Authority (EBA) and to the competent and designated authorities of the Member States concerned without delay and will publicly disclose the names of the O-SIIs on its website. This notification will be made public by the ESRB once the relevant authorities have adopted and published the notified macroprudential measure².

E-mailing/uploading this template to the above addresses constitutes official notification; no further official letter is required. To facilitate the work of the notified authorities, please send the notification template in a format that allows the information to be read electronically.

3. Timing for the measure						
3.1 Timing for the decision	The CBC took its initial decision on 18 October 2022. The final decision of the CBC was taken on 2 November 2022, after consulting with the ECB. 02/11/2022					
3.2 Timing for publication	One month after the final decision is taken (or the next business day in case this day is a bank holiday), as required by the CRD. 02/12/2022					
3.3 Disclosure	The measure has been communicated to the ESRB, and the ECB. One month after the final decision is taken, the CBC will publish the measure on its website and will send circular letters to the O-SII institutions informing them of this decision.					
3.4 Timing for application	01/01/2023					
3.5 Phasing in	The O-SII buffer will become fully binding as of 1 January 2023 (No phasing-in).					
	Name of institution		Date1	Date2	Date3	Date4

3.6 Review of the measure	Annual review, as required by the CRD.					
4. Reason for O-SII identification and activation of the O-SII buffer						
4.1 Scores of institutions or group of institutions concerned, as per EBA guidelines on the assessment of O-SIIs (Article 131.3 CRD)	Name of institution	Size	Substitut-ability	Com-plexity	Intercon-nectedness	Overall Score
	Bank of Cyprus Public Company Ltd	3.585	3.597	2.696	3.353	3.308
	Hellenic Bank Public Company Ltd	2.799	2.738	1.688	2.000	2.306
	Eurobank Cyprus Ltd	1.219	1.242	2.246	1.942	1.662
	RCB Bank Ltd	722	434	1.596	969	930
	Astrobank Ltd	452	968	421	201	510
	Alpha Bank Cyprus Ltd	465	333	448	724	493
	For the detailed scores of each credit institution, please refer to the attached file.					
4.2 Methodology and indicators used for designation of the O-SII (Article 131.3)	<p>The CBC followed the guidelines issued by the EBA and has set the threshold for the designation of O-SII institutions at 350 basis points.</p> <p>Only the mandatory indicators included in the EBA guidelines were used in the designation process. The designation covered all credit institutions established in Cyprus, including branches of EU credit institutions and branches of credit institutions of third countries.</p> <p>Following the adoption of the new European prudential framework for investment firms (the Investment Firms Regulation and the Investment Firms Directive), no Cyprus Investment Firm meets the conditions required to be subject to the prudential framework included in the CRD and in the CRR. As such, no Cyprus Investment Firm could meet the definition of O-SII institutions.</p>					
4.3 Supervisory judgement	Not applicable.					
4.4 Calibrating the O-SII buffer	<p>Following the publication of the relevant law that transposes the relevant articles of CRD V into national law, the CBC revised in 2021 its Policy on the calibration methodology for the O-SII buffer.</p> <p>The CBC Policy that is currently in force, follows the relevant guidelines issued by the EBA and sets the threshold for the designation of O-SII institutions at 350 basis points. Also, to continue ensuring a level playing field and to reflect the hierarchy between O-SIIs in terms of systemic importance, the CBC Policy calibrates the O-SII buffer in relative proportionality with the O-SII scores.</p>					

	<p>The number of the O-SII score buckets and their width is derived using a clustering methodology, taking into account past O-SII scores and the buckets used by the ECB in its (revised) floor methodology. In addition to the above, the CBC Policy follows the approach adopted by other member states to use empty buckets, that would serve as disincentives for further increases in the systemic importance of the most important credit institutions.</p> <p>The mapping between the O-SII score buckets and the O-SII capital buffer requirement follows a non-linear increase in the O-SII capital buffer requirement, where moving into the higher buckets of O-SII scores yields greater increases in the O-SII capital buffer requirement. This will also act as a disincentive for further increases in the systemic importance of the most systemically important credit institutions.</p> <p>Based on the above, the following mapping table was adopted by the CBC Policy and is used in the 2022 assessment:</p> <table border="1" data-bbox="571 689 1444 963"> <thead> <tr> <th>Total O-SII Score</th> <th>O-SII buffer rate</th> </tr> </thead> <tbody> <tr> <td>350 – 749</td> <td>0,25%</td> </tr> <tr> <td>750 – 1.299</td> <td>0,50%</td> </tr> <tr> <td>1.300 – 1.949</td> <td>0,75%</td> </tr> <tr> <td>1.950 – 2.699</td> <td>1,00%</td> </tr> <tr> <td>2.700 – 3.399</td> <td>1,50%</td> </tr> <tr> <td>3.400 – 4.199</td> <td>2,25%</td> </tr> <tr> <td>4.200 – 5.000</td> <td>3,00%</td> </tr> <tr> <td>Over 5.000</td> <td>Over 3% and to be examined on a case by case basis.</td> </tr> </tbody> </table>	Total O-SII Score	O-SII buffer rate	350 – 749	0,25%	750 – 1.299	0,50%	1.300 – 1.949	0,75%	1.950 – 2.699	1,00%	2.700 – 3.399	1,50%	3.400 – 4.199	2,25%	4.200 – 5.000	3,00%	Over 5.000	Over 3% and to be examined on a case by case basis.

<p>4.5 Effectiveness and proportionality of measure</p>	<p>Credit institutions can be considered systemic because of their size, complexity, interconnectedness and importance to the economy of Cyprus. In addition, their activities entail a number of risks and they contribute to the pro-cyclicality of the financial system. The imposition of the O-SII buffer on systemic credit institutions, is considered an effective measure to increase their resilience, so as to ensure that systemic credit institutions can withstand future losses without adversely affecting the stability of the financial system.</p>																		
<p>5. Sufficiency, consistency and non-overlap of the policy response</p>																			
<p>5.1 Sufficiency of the policy response</p>	<p>The imposition of the O-SII buffer on systemic credit institutions, is considered sufficient, since it significantly mitigates and reduces the build-up of risks over the short and medium term.</p> <p>The phasing-in arrangements that were adopted in earlier years to build-up the capital buffer and will come to its end in January 2023, ensured that there is limited unintended impact on the general economy.</p>																		
<p>5.2 Consistency of application of the policy response</p>	<p>The policy response is based on the provisions of the relevant EBA guidelines, the relevant articles of the CRD and the policy document adopted by the CBC on the calibration of the O-SII buffer.</p> <p>The adoption of the CBC policy document ensures that the policy response is applied consistently across O-SII institutions and over time.</p>																		

<p>5.3 Non-overlap of the policy response</p>	<p>No other policy instruments are used to achieve the intermediate objective of limiting the systemic impact of misaligned incentives with a view to reducing moral hazard.</p>
<p>6. Cross-border and cross-sector impact of the measure</p>	
<p>6.1 Assessment of cross-border effects and the likely impact on the Internal Market (Recommendation ESRB/2015/2³)</p>	<p>The imposition of the O-SII buffer, increases the resilience of the O-SII credit institutions, and facilitates their ability to absorb future losses. The phasing-in period of the O-SII buffer adopted in earlier years to build-up the capital buffer, which will come to its end in January 2023, is expected to contain any possible adverse effects on their economic activities. In addition, no inwards spillovers are expected, since the measure does not entail the loosening of prudential requirements.</p> <p>Effect on financial stability</p> <p>The measure is not only expected to improve the financial stability of the Cyprus banking sector, but also to contribute towards the financial stability of the internal market.</p> <p>Effect on lending</p> <p>Provision of credit to the real economy has been accelerating in recent quarters. The introduction of additional capital buffers in full at this juncture could limit the provision of credit. The phasing-in period adopted in earlier years to build-up the capital buffer, which will come to its end in January 2023, would facilitate the provision of credit and any necessary capital planning.</p> <p>Effect on economic growth</p> <p>Based on the characteristics of the measure and the phasing-in period adopted in earlier years to build-up the capital buffer, which will come to its end in January 2023, no material effect is expected on economic growth.</p>
<p>6.2 Assessment of leakages and regulatory arbitrage within the notifying Member State</p>	<p>Leakages and regulatory arbitrage within Cyprus are not likely, since no substitute services are available from unregulated providers.</p> <p>The scope for "leakages and regulatory arbitrage" in other jurisdictions is also narrow due to the very limited cross-border provision of credit intermediation services in Cyprus.</p>
<p>7. Combinations and interactions with other measures</p>	

³ Recommendation of the European Systemic Risk Board of 15 December 2015 on the assessment of cross-border effects of and voluntary reciprocity for macroprudential policy measures (ESRB/2015/3) (OJ C 97, 12.3.2016, p. 9).
