

Notification template for Article 131 of the Capital Requirements Directive (CRD) – Other Systemically Important Institutions (O-SIIs)

Template for notifying the European Central Bank (ECB) and the European Systemic Risk Board (ESRB) of the setting or resetting of an O-SII buffer under Article 131(7) CRD and of the identity of O-SIIs under Article 131(12) CRD

Please send/upload this template to:

- macropru.notifications@ecb.europa.eu when notifying the ECB (under Article 5 of the Single Supervisory Mechanism (SSM) Regulation¹);
- <u>DARWIN/ASTRA</u> when notifying the ESRB.

The ESRB will forward this notification to the European Commission, to the European Banking Authority (EBA) and to the competent and designated authorities of the Member States concerned without delay and will publicly disclose the names of the O-SIIs on its website. This notification will be made public by the ESRB once the relevant authorities have adopted and published the notified macroprudential measure².

E-mailing/uploading this template to the above addresses constitutes official notification; no further official letter is required. To facilitate the work of the notified authorities, please send the notification template in a format that allows the information to be read electronically.

1. Notifying national authority					
1.1 Name of the notifying authority	Financial Market Authority Liechtenstein				
1.2 Country of the notifying authority	Liechtenstein				
2. Description of the measure					
	On which institution(s) is the measure applied (name and Legal Entity Identifier (LEI) code)?				
	Is the measure applied at:				
	- The highest level of consolidation?				
2.1a Institution or group of	- A sub-consolidate	ited level?			
institutions concerned	- An individual level?				
	Name of institution	LEI	Consolidation level		
	LGT Bank AG	5493009EIBTCB1X12G89	Consolidated and individual level		
	Liechtensteinische Landesbank AG	5299000E1FOAM50XLP72	Consolidated and individual level		
	VP Bank AG	MI3TLH1I0D58ORE24Q14	Consolidated and individual level		

¹ Council Regulation (EU) No 1024/2013 of 15 October 2013 conferring specific tasks on the European Central Bank concerning policies relating to the prudential supervision of credit institutions (OJ L 287, 29.10.2013, p. 63).

1

² On request by the notifying authority, it may be agreed with the Head of the ESRB Secretariat that this notification, or a part thereof, should not be published for reasons of confidentiality or financial stability.

2.1b Changes to the list of	Please indicate under 2.1a any changes to the list as compared to the last notification, and provide an explanation, if applicable. The list is unchanged from the previous notification.					
institutions concerned						
	At what level is the fully phased-in buffer (in %) applied to the institution(s)?					
	Name of institution	New O-SII buffer	Previous O-SII buffer

in a separate Excel file.

4.2 Methodology and indicators used for designation of the O-SII (Article 131.3)	Please provide information on: a. whether you followed the EBA guidelines on the assessment of O-SIIs; b. which threshold score has been set to identify O-SIIs; c. whether relevant entities with relative total assets not in excess of 0.02% have been excluded from the identification process; d. the names and scores of all relevant entities not excluded from the identification process (could be sent in a separate Excel file, see 4.1); e. whether non-bank institutions have been included in the calculations.			
	 a. The identification of the O-SII follows the EBA guidelines according to EBA/GL/2014/10. b. The standard threshold of 350 basis points has been applied. c. All banks were part of the identification process. d. Please refer to the attached Excel file. e. Only banking institutions were considered. 			
4.3 Supervisory judgement	Have any of the institutions listed in 2.1 been identified by appling judgement as laid down in EBA guidelines on the assessment please list the respective institutions and provide information of a which of the optional indicators have been used to just assessment decisions, if any, and what the scores were bounded by the sequence of the why these optional indicators are relevant for the Menter of the bank is systemically important in terms of the optional indicators. None of the institutions listed were identified by applying super	of O-SIIs? If yes, n: stify the supervisory ere; nber State; se particular		
4.4 Calibrating the O-SII buffer	Please provide information on the criteria and indicators used to level of the O-SII buffer requirement and the mapping to institut requirements. With regard to the calibration methodology, the FMA has define with different buffer rates depending on the score. The categor institutions according to their level of systemic importance deprespective score. Each identified institution has to hold an O-S 1 %. Currently, all of the three identified O-SIIs are allocated to signalling "very high" systemic importance. Scores Category 0 – 349 No systemic relevance 350 – 674 Bucket 3 – considerable systemic importance 675 – 999 Bucket 2 – high systemic importance	tion-specific buffer ed three buckets ies differentiate the ending on the II buffer of at least		
4.5 Effectiveness and proportionality of measure	≥ 1000 Bucket 1 – very high systemic importance Please provide a justification for why the O-SII buffer is considereffective and proportionate to mitigate the risk. The impact of the failure of a systemic bank on the domestic find the real economy is much larger than the impact of the failure of bank. By increasing the loss-absorbing capacity of systemic insprobability of default is significantly reduced. Due to the large so Liechtenstein's O-SIIs relative to the domestic economy, we as O-SII buffers as being important to safeguarding financial stability.	ered likely to be nancial sector and of a non-systemic stitutions, the size of ssess the applied		
5. Sufficiency, consisten	ncy and non-overlap of the policy response			

For a macroprudential policy to be 'sufficient', the policy responses must be deemed to significantly mitigate, or reduce the build-up of, risks over an appropriate time horizon with a limited unintended impact on the general economy. 5.1 Sufficiency of the policy response Note that the ESRB will use the assessment of the macroprudential stance as relevant input in assessing the sufficiency of the macroprudential policy in the Member State. Please provide any additional information that the ESRB should consider in assessing the sufficiency of the policy response. The identification process of O-SIIs in Liechtenstein is based on the EBA guidelines (EBA/GL/2014/10). No supervisory judgement is applied. The bucketing approach with different buffer rates should consider differences in the degree of systemic importance. The measures taken are assessed to be sufficient. For a macroprudential policy to be 'consistent', the policy instruments meet their respective objectives, as outlined in ESRB/2013/13, and must be implemented in accordance with the common principles set out in the relevant legal texts. 5.2 Consistency of Note that the ESRB assessment of consistency will consider whether the same application of the policy systemic risks are addressed in a similar way across and within the Member States response over time. Please provide any additional information that the ESRB should consider in assessing the consistency of the policy response. The application of an O-SII buffer is both time and cross-country consistent. For a policy instrument to be 'non-overlapping', it should aim to address a systemic risk that either differs from a risk addressed by other active tools in the same Member State, or be complementary to another tool in that Member State which addresses the same systemic risk. 5.3 Non-overlap of the policy response Are other policy instruments used to address the <u>same</u> systemic risk? If yes, please explain the need for more than one instrument to address the same systemic risk and how the different instruments interact with each No other active instrument addresses the same systemic risks. 6. Cross-border and cross-sector impact of the measure Assessment of the cross-border effects of implementation of the measure. a. Assessment of the spillover channels operating via risk adjustment and regulatory arbitrage. The relevant indicators provided in Chapter 11 of the 6.1 Assessment of cross-ESRB Handbook on Operationalising Macroprudential Policy in the Banking border effects and the likely impact on the Internal Market Sector⁵ and the Framework to assess cross-border spillover effects of macroprudential policies of the ECB Task Force on cross-border spillover (Recommendation ESRB/2015/24) effects of macroprudential measures can be used. b. Assessment of the:

³ Recommendation of the European Systemic Risk Board of 4 April 2013 on intermediate objectives and instruments of macro-prudential policy (ESRB/2013/1) (OJ C 170, 15.6.2013, p. 1)

jurisdiction (inward spillovers);

cross-border effects of implementation of the measure in your own

5

⁴ Recommendation of the European Systemic Risk Board of 15 December 2015 on the assessment of cross-border effects of and voluntary reciprocity for macroprudential policy measures (ESRB/2015/3) (OJ C 97, 12.3.2016, p. 9).

⁵ Available on the ESRB's website at www.esrb.europa.eu.

- cross-border effects on other Member States and on the Single Market of the measure (outward spillovers);
- overall impact on the Single Market of implementation of the measure.

The measure applies to Liechtenstein banks at the consolidated and individual level. Theoretically, there could be an impact on individuals or companies outside of Liechtenstein through cross-border credits or exposures of subsidiaries and branches. However, given the current capitalisation of the identified banks – well above the regulatory requirements, including buffers – the FMA expects the impact to be very low (or even inexistent).

6.2 Assessment of leakages and regulatory arbitrage within the notifying Member State

Referring to your Member State's specific characteristics, what is the scope for "leakages and regulatory arbitrage" in your own jurisdiction (i.e. circumvention of the measure/leakages to other parts of the financial sector)?

Is there scope for "leakages and regulatory arbitrage" in other jurisdictions?

Since the buffer is applied at the consolidated level, jurisdictional shifts of activities within the banking groups due to regulatory arbitrage are impossible. Additionally, given the high capitalisation of the identified institutions, the incentives to circumvent the measures are very limited.

7. Combinations and interactions with other measures

7.1 Combinations between G-SII and O-SII buffers (Article 131.14)

If both G-SII and O-SII criteria apply to the same institution at consolidated level, which of the two buffers is the highest?

Name of institution	O-SII buffer	G-SII buffer
	%	%
	%	%
	%	%

Are any of the institutions identified as O-SIIs subject to a systemic risk buffer?

If yes, please provide the following information:

- a. What is/are the systemic risk buffer rates(s)?
- b. At what level is/are the systemic risk buffer rate(s) applied (i.e. consolidation level and/or individual)?
- c. Is the sum of the systemic risk buffer rate(s) and the O-SII buffer rate (or the higher of the G-SII and O-SII buffer rates, if a group is subject to a G-SII buffer and to an O-SII buffer at consolidated level) to which the same institution is subject over 5%?

7.2 Combinations with systemic risk buffers (SyRBs)

(Article 131.15 CRD)

Name of institution	SyRB rate	SyRB application level	Sum of G-SII/O- SII and SyRB rates
LGT Bank AG	1% for loans secured by residential and commercial property in Liechtenstein	Consolidated and individual level	3%
Liechtensteinische Landesbank AG	1% for loans secured by residential and commercial property in Liechtenstein	Consolidated and individual level	3%
VP Bank AG	1% for loans secured by residential and commercial property in Liechtenstein	Consolidated and individual level	3%
