ESRB/2019/0171

Recommendation of the European Systemic Risk Board of 27 June 2019 on medium-term vulnerabilities in the residential real estate sector in Sweden (ESRB/2019/9)

Dear Ms Andersson,

This is to inform you that on 27 June 2019, the General Board of the European Systemic Risk Board (ESRB) adopted Recommendation of the European Systemic Risk Board of 27 June 2019 on medium-term vulnerabilities in the residential estate sector in Sweden (hereinafter "Recommendation ESRB/2019/9"). The General Board of the ESRB also adopted five other country-specific ESRB Recommendations, addressed to five other Member States that also received ESRB Warnings in 2016, on medium-term vulnerabilities in their respective residential real estate sector. Furthermore, on the same date, the General Board of the ESRB also adopted five country-specific ESRB Warnings, addressed to Member States in which vulnerabilities relating to the residential real estate sector as a source of systemic risk have been newly identified as not being sufficiently addressed.

Vulnerabilities relating to the residential real estate can be a source of systemic risk and may affect financial stability both directly and indirectly. In 2016, the ESRB conducted a Union-wide assessment of the vulnerabilities relating to residential real estate¹. This assessment enabled the ESRB to identify a number of medium-term vulnerabilities in several countries as sources of systemic risk to financial stability, which led to the issuance of warnings to eight countries: Belgium², Denmark³, Luxembourg⁴, the Netherlands⁵, Austria⁶, Finland⁷, Sweden⁸ and the United Kingdom⁹.

¹ See 'Vulnerabilities in the EU Residential Real Estate Sector', ESRB, November 2016, available on the ESRB's website at www.esrb.europa.eu.

² Warning ESRB/2016/06 of the European Systemic Risk Board of 22 September 2016 on medium-term vulnerabilities in the residential real estate sector of Belgium (OJ C 31, 31.1.2017, p. 45).

³ Warning ESRB/2016/07 of the European Systemic Risk Board of 22 September 2016 on medium-term vulnerabilities in the residential real estate sector of Denmark (OJ C 31, 31.1.2017, p. 47).

In 2016 the main vulnerability identified in the residential real estate market in Sweden related to the substantial and prolonged growth in both house prices and mortgage loans, which led to an overvaluation of house prices as well as to high and increasing household indebtedness.

The ESRB has recently concluded a systematic and forward-looking European Economic Area (EEA)-wide assessment of vulnerabilities relating to residential real estate. As regards Sweden, this recent assessment has revealed that, since 2016, the growth in house prices has decelerated, and they are currently at the same level as in 2016. However, house prices remain overvalued and household indebtedness has increased significantly.

Furthermore, while cyclical factors play an important role in fuelling the vulnerabilities that have been identified in Sweden, there are also important structural factors that have driven these vulnerabilities, resulting in a higher level of systemic risk. These factors include: (i) a lack of housing supply, which has been exerting upward pressure on house prices and debt for households that buy their own property; and (ii) the favourable tax treatment of housing, such as the tax deductibility of interest paid on mortgage loans, which may facilitate house price increases and act as an incentive for households to overborrow.

The General Board of the ESRB, having assessed the results of the risk and policy analyses carried out, and despite the fact that it acknowledges the wide range of macroprudential measures that are in place in Sweden, has concluded that even though these macroprudential measures are appropriate, they are partially sufficient to address the identified vulnerabilities related to residential real estate, in particular the household indebtedness and overvaluation of house prices, in the medium term.

For this reason, the General Board of the ESRB decided to issue a Recommendation to Sweden on medium-term vulnerabilities in its residential real estate sector. The purpose of Recommendation ESRB/2019/9 is to recommend: a) broader policy action aiming to curb factors which facilitate or promote increasing household indebtedness; and b) the tightening of the existing, or the activation of other, macroprudential measures if the vulnerabilities related to household indebtedness and overvaluation of house prices continue to increase due to cyclical economic and financial reasons. The measures proposed in Recommendation ESRB/2019/9 are aimed at complementing the existing macroprudential measures in Sweden. Given that the identified vulnerabilities are, to some extent, driven by structural factors which go beyond macroprudential policy, other policies are needed to complement and support the current macroprudential measures, with the aim of addressing factors contributing to the build-up of systemic risks in the residential real estate market in Sweden more efficiently and effectively, without producing excessive costs for the Swedish real economy and financial system.

⁴ Warning ESRB/2016/09 of the European Systemic Risk Board of 22 September 2016 on medium-term vulnerabilities in the residential real estate sector of Luxembourg (OJ C 31, 31.1.2017, p. 51).

⁵ Warning ESRB/2016/10 of the European Systemic Risk Board of 22 September 2016 on medium-term vulnerabilities in the residential real estate sector of the Netherlands (OJ C 31, 31.1.2017, p. 53).

⁶ Warning ESRB/2016/05 of the European Systemic Risk Board of 22 September 2016 on medium-term vulnerabilities in the residential real estate sector of Austria (OJ C 31, 31.1.2017, p. 43).

⁷ Warning ESRB/2016/08 of the European Systemic Risk Board of 22 September 2016 on medium-term vulnerabilities in the residential real estate sector of Finland (OJ C 31, 31.1.2017, p. 49).

⁸ Warning ESRB/2016/11 of the European Systemic Risk Board of 22 September 2016 on medium-term vulnerabilities in the residential real estate sector of Sweden (OJ C 31, 31.1.2017, p. 55).

⁹ Warning ESRB/2016/12 of the European Systemic Risk Board of 22 September 2016 on medium-term vulnerabilities in the residential real estate sector of the United Kingdom (OJ C 31, 31.1.2017, p. 57).

In line with Article 18(2) of Regulation (EU) No 1092/2010¹⁰, I would hereby like to inform you that Recommendation ESRB/2019/9 will be published on the ESRB's website and later in the *Official Journal of the European Union*. In addition, in line with Article 18(3) of Regulation (EU) No 1092/2010, addressees of public recommendations have the right to make public their views and reasoning on the matter. Should you wish to utilise this right, you are kindly invited to submit to the ESRB Secretariat any views and reasoning that you may have on the matter by 9 September 2019.

Please also note that the following reports, adopted by the ESRB on 27 June 2019, will be made available electronically:

- "Follow-up report on countries which received ESRB warnings in 2016 for medium-term vulnerabilities in the residential real estate sector";
- "Methodologies for the assessment of real estate vulnerabilities and macroprudential policies – residential real estate"; and
- "Vulnerabilities in the residential real estate sectors of the EEA countries".

Yours sincerely,

Francesco Mazzaferro

Head of the ESRB Secretariat
